start
V_est = DNN(G, T, I1…I14)
handoff: P&O restarts at V_est
SCAN
(one control cycle,
energy = mean probe power)
TRACK
P&O from V_est,
step 0.5 V
er: P/G < 0.9·max(P/G) since scan (≥ 30 cycles)
or 300 cycles since the last scan
